- **Project management:** a single point of contact for both technical and administrative questions

## Records management

- **Complete management of documents:** on-site collection, advice on filing and indexing the archives using an intuitive coding, and solutions for their destruction
- **Digitization of archives** to free space and benefit from immediate access to documents
- **Secure storage** in a private or grouped space or in safes: storage solutions adapted to the level of confidentiality required
- **Easy access and consultation** thanks to daily deliveries of archives or their consultation in our visiting rooms

# The Art of Moving Forward

– a family business which combines tradition and innovation –

*Isabelle Harsch, CEO*

- It all began in 1957 when my grandfather, Henri Harsch, founded the company of the same name. At that time he specialised in the transport of works of art. His foremost priority was to guarantee complete security for the works by providing his clients with a top-quality service.
- The story continued in 1973 when my father, Bertrand Harsch, joined him to play an active role in the development of the company. Success was not long in coming with the creation of new services: international moves, office relo-

cation, records management and relocation services. Development has been widespread in Switzerland with the construction of several storage locations and the opening of subsidiaries throughout the country.

- It is a privilege for me today to continue this family business and guide it into the 3<sup>rd</sup> generation. I am committed to carrying out this task well and preserving the values laid down by the previous generations while at the same adapting the company to the marketplace.
- The Art of Moving Forward echoes this idea. The goal of our company is to continue to progress while maintaining the legacy of the past. Today, the quality can not only be seen in the work carried out but also in the innovative solutions offered to clients.
